

PRACTICAL APPLICATION SHEET

PRODUCT DESCRIPTION

OXYLATE is an international recognized biodegradable advanced technology multi-surface cleaning solution designed to simplify cleaning process. Formulated with the latest surfactant additives that allows sheeting water to remove dirt fast effortlessly. Probable one of the most advanced multi-surface cleaning solution in the world today.

PRACTICAL APPLICATIONS

Proven to remove tough dirt, dust, grime, light oil, soot, bird droppings and reduce water streak marks on various surfaces with one easy application. The right biodegradable cleaning solution to clean building façade and keep fixtures and fittings looking new longer.

PRODUCT ADVANTAGES

- **OXYLATE** advanced surface cleaning technology surfactants removes contaminants without hard abrasion to be easily rinsed away with water.
- Simplifies cleaning process with less time and effort.
- Large effective cleaning coverage up to 150sqm surface area per liter.
- Prevents water streak marks and haze on glass when used daily.
- Saving money through process efficiency, simplified logistics, storage and labor.
- Helps businesses comply with effluent discharge regulations from cleaning activities.
- Increases a corporation's social responsibility profile by being environmentally responsible.

METHOD STATEMENT

Recommended Dilution:

- Undiluted to remove light oxidization on stainless steel and spot cleaning.
- 1 part **OXYLATE** to 5 parts water for harden dried up dirt.
- 1 part **OXYLATE** to 10 parts water for daily general cleaning.

To Use:

1. To remove light oxidization on stainless steel - Apply **OXYLATE** undiluted on microfiber cloth and spot clean.
2. To clean glass surfaces – Dilute required ratio of **OXYLATE** and water into spray bottle. Spray dilution directly onto glass and clean with microfiber cloth. Rinse way after with water.
3. To clean floor – Dilute required ratio of **OXYLATE** and water into spray bottle. Spray dilution directly onto floor and clean with wet mop or scrubbing machine. Rinse way after with water.

WHY OXYLATE?

- When time is money, **OXYLATE** is the proven multi-surface cleaning solution for the job.

SAFETY, HANDLING AND STORAGE:

Keep in dry, cool place away from direct sunlight.

Do not swallow. If product is accidentally swallowed, seek medical help immediately.

Rinse with plenty of water when contact with eyes.

Identification : Light yellow translucent liquid, mixes completely with water.

pH (as supplied) : 5.5 – 6.5 Basic.

HS Code : 3402900090

AVAILABLE PACKING SIZE:

1 Liter Bottle
5 Liter Bottle
18 Liter Bucket
